## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

## 1-14. (Canceled)

- 15. (Currently Amended): A display apparatus having a plurality of pixels, comprising on a substrate:
- a plurality of pixel electrodes corresponding to respective pixels among the plurality of pixels;
- a plurality of driving thin film transistors, each located outside of said plurality of pixel electrodes and comprising a plurality of conductive layers, for controlling supplying of signal voltage to the plurality of pixel electrodes;
- a plurality of input terminals for receiving a control signal for the signal voltage to be supplied to the plurality of driving thin film transistors; and

wires, at least some of said wires being connected between said plurality of driving thin film transistors and said plurality of input terminals for sending the signal voltage from the plurality of input terminals to the plurality of driving thin film transistors, wherein each of the wires includes a first conductive layer formed of the lowest conductive layer of the driving thin film transistor and a second conductive layer situated above the first conductive layer and formed of other conductive layer of the driving thin film transistor, at least a portion of one of said wires being located near the peripheral area of the substrate and outside of said plurality of driving thin film transistors to function as an electric shielding wire-shield for said plurality of driving thin film transistors.

Appl. No. 09/160,312 Amdt. Dated December 22, 2003 Reply to Office Action of June 27, 2003

Attorney Docket No. 5586D-6921 (81784.0185) Customer No.: 26021

- 16. (Currently Amended): The display apparatus of claim 1 15, further comprising a plurality of switching thin film transistors located in a display area, and a driving circuit located outside of the display area for receiving signals from the wires, the driving circuit including the driving thin film transistors.
- 17. (Previously Presented): The display apparatus of claim 16, wherein at least one side of the driving circuit is adjacent a part of the wires.
  - 18. (Canceled)
  - 19. (Canceled)
